

TRANSPARENCY

The foundational values at Sugar that continue to drive our development are creating a [user friendly](#), [compliant](#) and [secure environment](#). In the spirit of these values, we are looking forward to keeping our dedicated and supportive community informed of all our sweet new developments.

SUGAR'S RECENT RELEASES

In April, we launched our completely redesigned website to further our mission of ensuring that all investors, regardless of experience level, can be a part of the cryptocurrency movement by providing the market's most usable, compliant and secure exchange.

In order to do so, we are providing our community with increased clarity around our development and exciting new offerings.

Our new site allows us to more meaningfully connect with community members through:

- [Beta Access Registration](#)
- [Contact Us Form](#)
- [Newsletter Signup](#)

Our community can access our explainer video, updated whitepaper and roadmap to obtain detailed information on our achievements and planned journey ahead.

In addition to the Sugar Exchange Trading Platform, Sugar is excited to offer its growth advisory services. Many cryptocurrency entrepreneurs, startups and stakeholders have approached our team for professional feedback to help them achieve success in the crypto space. To meet this demand, we established SWEET GENIUS, which offers a wide range of support services, from ICO advisory to token audits.

GET LISTED allows you to submit your cryptocurrency to the Sugar Exchange trading platform. As Sugar's Exchange nears launch, we welcome tokens to submit applications to Get Listed and join the tokens which have already submitted applications and will be tradable when the exchange launches. The application is now live on our website and we look forward to continuing our partnerships with the most innovative and desirable tokens on the market.

ONGOING EXCHANGE DEVELOPMENT

The Sugar Team is currently working diligently to develop the exchange. We appreciate your continued patience as we continue to work with our legal team to clear the regulatory hurdles involved in launching the most compliant exchange on the market. We remain incredibly optimistic following some recent updates around a summer launch date. We invite you to browse through our development screenshots of the exchange on our updated website to get a taste of our upcoming release!
